1	**API action**	peer; typed audience = specialists; source = 1
2	**Textual propositions**	“guest group is specialists” + criticism of Saturday One supported audience assertion and a separate day objection.
3	**Actual delivery**	Sender/claim/slot/value/source reach Ellis’s inbox at turn 13. Both the user’s Tuesday approval and this message are visible.
4	**Observed continuation**	Ellis repeats “The event day should be Saturday…” The answerer’s structured plan retains Tuesday.
